DETAILED ACTION

Claims 30-47 are currently pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 30-37 and 45, drawn to pharmaceutical compositions comprising mimesulide and oxycodone, classified in class 564, subclass 92 and class 546, subclass 45.
- II. Claims 38-44 and 46-47, drawn to method of treating pain by administering mimesulide and oxycodone, classified in class 514, subclasses 355, 605 and 282; class 424, subclass 468.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for using the product as claimed can be practiced with another materially different product, such as administering aspirin or other pain killers.

Upon the election of a compound invention (e.g. group I) and upon the indication of allowable subject matter, the Examiner will consider the rejoinder of method of use claims commensurate in scope to the allowed compound claims (e.g. Rejoinder).

Because these inventions are distinct for the reasons given above and:

- a. have acquired a separate status in the art as shown by their different classification;
and/or
- b. the search required for Group I is not required for Group II; and/or
- c. because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

ELECTION OF SPECIES (GROUP I ONLY)

This application contains claims directed to the following patentably distinct species of the claimed invention: different dosage formulations (E.g. oral, topical, suppository etc.: see claims 33 and 34) which require different and separately burdensome manual and computer bibliographic searches in patent and literature areas..

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 30 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
